B.E Computer Science graduate with strong proficiency in Java, MySQL, JDBC, OOPs, and Exception Handling. Strong understanding of Data Structures, OOP, and Software Development Life Cycle (SDLC). Designed two end-to-end software projects targeting real world problems in career guidance and campus event management. Seeking a Software Engineer role to contribute strong backend fundamentals and a problem-solving mindset to a collaborative engineering team.

EDUCATION

- Bachelor Of Engineering in Computer Science and Engineering - CGPA-**8.89/10**
  SG Balekundri Institute of Technology,Belagavi
- 12th - Government PU College,Majalatti. Percentage- **85%**
- SSLC - G.E.S High School,Gokak. Percentage-**90.56%**

Technical Skills

- Programming: Java
- Web Technologies: HTML, CSS, JavaScript
- Frameworks: Spring Boot
- Database: MySQL
- Core Concepts: Data Structures & Algorithms, OOP
- Tools: Git

PROJECTS

College Event Management System

- Built a centralized web platform to manage and display college events, improving accessibility for students.
- Designed and implemented secure admin authentication (login/logout) for event creation and management.
- Developed 6+ RESTful APIs using Spring Boot integrated with MySQL database.
- Implemented auto-removal logic for expired events to maintain data accuracy.
- Enabled event filtering by category and date, reducing manual search effort.
- Designed responsive UI for seamless browsing of upcoming events.
- Improved event visibility and student participation through a unified platform.

CareerMatch – Career Recommendation System

- Developed a full-stack web application to recommend career paths based on user skills.
- Designed an intuitive system allowing users to select from 30+ skills for personalized career suggestions.
- Implemented a skill-matching algorithm to generate accurate career match percentage scores.
- Built a recommendation engine that displays relevant roles with detailed insights.
- Included career details such as average salary and structured learning roadmaps for guidance.
- Ensured meaningful recommendations by eliminating generic and random suggestions.
- Improved user decision-making by providing data-driven and personalized career insights.

INTERNSHIPS

Rooman Technologies

AI and ML Intern

- Explored core concepts of Artificial Intelligence and Machine Learning, including supervised and unsupervised learning.
- Gained hands-on experience by working on mini-projects under expert guidance.
- Developed understanding of practical applications of AI/ML in solving real-world problems.

SG Balekundri Institute of Technology

Mobile Application Development Intern

- Developed Android mobile applications with hands-on experience in building functional apps
- Gained practical knowledge of UI design and application structure
- Worked with development tools to design, build, and test mobile applications
